IMPORTANT INFORMATION

Before investing you should carefully consider the Fund's investment objectives, risks, charges and expenses. This and other information is in the prospectus. A prospectus may be obtained by visiting <https://www.gham.co> or calling (866) 898-6447. Please read the prospectus carefully before you invest.

As with all ETFs, Fund shares may be bought and sold in the secondary market at market prices. The market price normally should approximate the Fund's net asset value per share (NAV), but the market price sometimes may be higher or lower than the NAV. The Fund is new with a limited operating history. There are a limited number of financial institutions authorized to buy and sell shares directly with the Fund; and there may be a limited number of other liquidity providers in the marketplace. There is no assurance that Fund shares will trade at any volume, or at all, on any stock exchange. Low trading activity may result in shares trading at a material discount to NAV.

Investing involves risk, including possible loss of principal. There can be no assurance that a Fund will achieve its stated objectives.

The Fund's performance, because it is a fund of funds, is dependent on the performance of the Underlying Funds. The Fund is subject to the risks of the Underlying Funds' investments, and the Fund's shareholders will indirectly bear the expenses of the Underlying Funds.

In addition, at times certain segments of the market represented by the Underlying Funds may be out of favor and underperform other segments. The shares of an exchange-traded fund ("ETF") may trade at a discount or premium to its net asset value ("NAV").

Additionally, the securities of exchange in which the Fund will invest may be leveraged. As result, the Fund may be indirectly exposed to leverage through an investment in such securities. An investment in securities of ETFs that use leverage may expose the Fund to higher volatility in the market value of such securities and the possibility that the Fund's long-term returns on such securities (and, indirectly, the long-term returns of the Shares) will be diminished.

An investment in the Fund may be subject to risks which include, among others, ADR, Asset-Backed and Mortgage Backed Securities, Commodities Future Contract, Convertible Securities, Emerging Markets, Fixed Income Securities, Foreign Securities, Futures, Hedging, High Yield Securities, Large Capitalization Stock, Management, Market and Geopolitical, MLP and MLP Securities, Preferred Stock, Options, REIT, Small and Medium Capitalization, Sovereign Bond Futures and Volatility Futures Contract risks.

To respond to adverse market, economic, political or other conditions, the Fund may invest 100% of its total assets, without limitation, in high-quality short-term debt securities and other money market instruments. While the Fund is in a defensive positions, the Fund may not achieve its investment objective.

Diversification does not ensure a profit or protect against loss in declining markets.

Shares of the Fund are distributed by Paralel Distributors LLC.
